

Glossy Finishing Sheet

About this product:

Use the Dazzle-Trans to produce a glossy finish to your transfers. To achieve the best results, we recommend using a heat press.

Optional - Trim Dazzle-Trans

You may trim the Dazzle-Trans to a workable size or use the entire sheet when applying.

Note: if trimming, make sure to cut the Dazzle-Trans larger than the image it will cover to ensure complete coverage when applied.

A). Light Fabric Instructions:

(NOTE: For light transfers, press your image to your garment BEFORE applying Dazzle-Trans)

- 1 Print your image onto your light transfer paper as you normally would. Trim, peel and press your image to your garment using the instructions for your transfer paper.

Pre-heat heat press to 350-375 degrees.

- 2 Using a heat-press, place the Dazzle-Trans, **shiny side down**, on top of the already pressed image so that it covers the entire image area.
- 3 Press the garment at 350-375 degrees for 5-10 seconds with medium firm pressure.
- 4 Open the press and begin rubbing the back of the Dazzle-Trans with a soft cloth or another t-shirt. DO NOT PEEL yet.
- 5 Wait for the Dazzle-Trans to completely cool. Cold peel recommended.

B). Dark Fabric Instructions:

(NOTE: For dark transfers, apply Dazzle-Trans at the SAME TIME you press your image to your garment)

- 1 Print your image onto your dark transfer paper as you normally would. Trim, peel and position the transfer as stated in your Dark/Opaque transfer paper instructions.
- 2 Instead of using silicon paper, substitute for Dazzle-Trans by doing the following:
 - i). Position the Dazzle-Trans, **shiny side down**, on top of the dark/opaque transfer which is placed over your garment.
 - ii). Press the Dark/Opaque transfer as you normally would using the recommended temperature & time from your transfer paper instructions.
- 3 Open the press and begin rubbing the back of the transfer with a soft cloth or another t-shirt. DO NOT PEEL yet.
- 4 Wait for the Dazzle-Trans to completely cool. Cold peel recommended.

Tips:

- FOR USE WITH HEAT PRESSES
- Use in a well-ventilated area.
- Store Dazzle-Trans in a zip-lock bag until use.
- Do not print on Dazzle-Trans paper.

TROUBLE-SHOOTING:

- Transfer is sticking: Either the Dazzle-Trans has not cooled enough or it was "baked on". Reduce temperature and or time and repeat.

Important Note: Heat presses vary in accuracy. Conduct your own test to determine the best time and temperature to use with your own equipment.

Washing Instructions:

- Leave finished item for at least 24 hours before washing.
- Fabrics may then be machine washed separately (inside out, DO NOT USE BLEACH or bleach additive detergent) in cold water.
- Do NOT use fabric softener
- Dry at normal setting; do not dry clean.
- Keep product in closed package between uses; store in a cool, dry place.
